

Providing world class, client focused digital investigations

DELEVAN GROUP

Digital Forensics Services

The Delevan Group provides highly experienced forensic examiners familiar with best practices concerning the collection, analysis, and reporting of electronic evidence.

Services Overview

Increasing Variety of Electronic Data Sources

New enterprise communication methods are constantly being deployed. It's no longer appropriate to limit your consideration of electronic evidence to email and electronic office files. The Delevan Group has experience addressing an increasing variety of data sources including cloud data, social media accounts, mobile devices, and enterprise chat services. Our professionals can assist you with identifying relevant electronic data within the enterprise and determining the best methods to preserve and review those communications.

Preservation Strategies that Facilitate Client Needs

Our goal is to facilitate a thorough and defensible preservation process without implementing collections that acquire large volumes of documents and data that have nothing to do with the matter at hand. By implementing a consultative approach and addressing the specific needs of the matter, our professionals work to limit the downstream costs associated with processing, searching, and hosting by limiting the data collected to include only those documents that potentially contain relevant information.

Best Practices to Prevent Evidence Spoliation

The Delevan Group performs data preservation and collection with care to ensure all electronic evidence can be presented in court without fear of evidence spoliation challenges. We utilize industry standard imaging technology, best practices related to documentation and evidence handling. Our professionals know that the evidence collection process, if mishandled can have an adverse impact on your ability to rely on key documents and evidence when arguing your case. The Delevan Group ensures that all evidence collected can be relied on and tested in court.

Client Driven Support

Forensic Collections

We are involved from the onset to provide guidance and advice to our clients to help identify the people, the data sources, and timeframe of the electronic data being preserved and collected.

Forensic Analysis

Our professionals utilize industry proven forensic tools to provide defensible and repeatable findings in analysis results. We can report these findings and attest to the processes used.

Expert Testimony

The Delevan Group offers a number of experts with experience providing testimony in a variety jurisdictions, including state and federal courts. We have presented to government agencies, provided 30(b)(6) testimony, and testified at trial.
